

As part of our client's team, you will play a central role in finding solutions to some of the biggest scientific challenges of our time.

Our client's goal is to reduce the suffering of people with life-changing therapies by harnessing the potential of the immune system to develop novel treatments for cancer and infectious diseases.

We are looking for a dedicated individual to join us as soon as possible as a

Scientist, Scientific Writer (Immunomodulators) (gn)

Standort: Near Frankfurt a.M.

Kennziffer: 26834

Your tasks

In this position, you will be responsible to secure a seamless and fast flow of information from the research team to our internal and external partners, linking preclinical results to clinical development activities. Your main responsibilities are:

- Working within a team of scientists on research and development of highly innovative cancer immunotherapies: Providing scientific communication support, including data analysis, writing high quality reports, publications and summaries of preclinical and translational data
- Supporting the team in scientific data analyses, data processing and interpretation, as well as being responsible for literature and database searches
- Writing and steering the provision of documents for regulatory purposes in order to assure the timely provision of these documents in development projects
- Linking preclinical research activities to clinical development. Securing a seamless and fast flow of information from the research team to the project management team, the regulatory team, and the clinical team
- Representing the team in internal meetings and in the communication with external partners with the above mentioned tasks

Your qualifications

- Successfully completed Ph.D. in immunology, ideally in immune-oncology, as well as professional experience in this field, ideally in an industry position
- Strong analytical skills, being able to extract the essence of scientific data and translate transfer these it into well written documents
- The talent to combine managerial management tasks with scientific content
- Working proactively and well-organized in cross-functional working groups
- Proven ability to work independently and be self-motivated
- Excellent communication and presentation skills to efficiently relay information to project teams and other key stakeholders
- Highly proficient in English (written and spoken), good command of German is a plus
